All the used materials are unpainted, uncoated and uncolored.

For a detailed step-by-step recycling instruction please contact sales@susupport.com

Standard pallet and carboard boxes: The boxes we use are 100% recyclable.2

technologies do not have a large environmental impact.1

The RoSS® shell's purpose is to ensure maximum protection of single-use bags, achieving product loss rates as low as 0.001%. This level of performance can only be guaranteed when the shell is used as intended and validated. Reusing RoSS® shells without proper re-validation may introduce variability in sterility and structural performance, which could affect the reliability of product protection.
